

Content Vocabulary

LESSON 2

Asexual Reproduction

Directions: Write the correct term in the boxes to the right of each definition. Then unscramble the letters from the shaded boxes to spell an eighth term.

asexual reproduction

budding

cloning

culture

fission

potential

regeneration

vegetative reproduction

1. cell division in prokaryotes

--	--	--	--	--	--	--	--

2. a type of asexual reproduction in which a new organism grows on the body of the parent organism

--	--	--	--	--	--	--	--

3. the process of growing living tissue in a laboratory

--	--	--	--	--	--	--	--

4. possibility

--	--	--	--	--	--	--	--	--	--

5. asexual reproduction in which a new organism grows from a piece of its parent

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

6. the production of offspring by one parent without meiosis and fertilization

--	--	--	--	--	--	--	--

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

7. asexual reproduction by plants

--	--	--	--	--	--	--	--	--	--

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

8. When they are unscrambled, the letters in the shaded boxes spell _____, which is the process of making identical individuals.
