

Name: _____ Date: _____

The **Scientific** Method

There are six steps in the scientific method. Use Flocabulary's scientific method video to review the steps and fill in the names in the first column. In the second column, explain what each step means. Use the last column to organize your own experiment.

STEPS	What do you do at this step? Why do you do it?	Example of this step (You can use this to review an experiment or plan your own!)
