

Name _____

Date _____

Six Kingdoms

"The Six Kingdoms of Life"

I've been searching everywhere. I know there's six kingdoms of life, and I'm going to go through everyone of them until I find you.

Archaea, Bacteria and Protists,

Animals, Plants, Fungi, yeah, you know this.

There are six _____ of life,

But you're the only one that can make me feel right.

Ever since they took you away,

You've been on my mind all night and all day.

I need to get you back, I mean it's hard to live,

So I searched all six kingdoms, I started with

The oldest kingdom, _____,

It's just single-cell organisms. You see, uh,

They don't even have a nucleus,

In cold trenches and hot springs, archaea do exist.

Next I visited the kingdom of _____,

They're in the air everywhere, it was scarier.

Bacteria are all over, what's cool,

They help us _____ our food.

But I still couldn't find you, it was hopeless,

I wandered to the water kingdom of the protists.

The _____ include amoebas and plankton,

The algae hadn't seen you, but I thanked them.

Onto the kingdom in the darkest land,

Mushrooms _____ dead animals and plants.

The kingdom of _____ left me feeling scared,
But finding you soon was my only care.
Moved on to the green kingdom of the _____,
They were bathed in light, and they seemed to dance.
With _____ turning sunlight into power,
I sat on a bed of moss and gazed at the flowers.
The sixth kingdom, there was only one left,
_____, I swear they took away my breath.
I saw a whale breach and a hawk soar,
Butterflies in the sky, heard a lion roar.
All the energy that they have, they get from food,
It was beautiful, but then I saw you.
All six kingdoms I had seen,
Couldn't compare to the moment you were next to me.

Archaea, Bacteria and Protists,
Animals, Plants, Fungi, yeah, you know this.
There are six kingdoms of life,
But you're the only one that can make me feel right. (x2)
